

The USC-211 is an analogue Telephone/Intercom/Talkback station used on mooring stations, workshops etc, for direct calls to Bridge or ECR. It has 3 direct call buttons. The station can be called by any telephone. Both headset microphone and re-entrant horn speaker can be used for talkback and communication. A command talkback call can be set up from a USC-411 or USC-421, where the call will immediately open the speaker of USC-211. Speech direction is entirely controlled by the PTT key of the calling party, making USC-211 work in Hands Free mode. A talkback group call can be made for up to ten USC-211 stations, forming a command group call where all stations are listening when the calling party is speaking.

Type approved by DNV

FEATURES

- Adjustable gain and volume
- Connection for headset
- Connection for Horn speaker (8 Ohm)
- 3 call buttons (plus headset PTT)
- Receives PA calls
- Receives Alarm calls
- Receives talk-back calls as substation
- Can be called from any telephone
- Delivered with 2 cable glands

OPTIONAL

- Headset with boom mic
- Hornspeaker
- Protective front door
- Built into cabinet for extra protection and stowing headset (USC-211CAB)

OPTIONAL HEADSET

SPECIFICATIONS

Power supply	24V DC
Power output - horn speaker	15W
Built-in ringer sound	75 dB at 1m
Relay contact	24V DC 1A
Material	Aluminium (seawater resistant)
Colour	Dark blue / black
Temperature range	-25° to +70°C
IP rating	IP-65
Dimensions (H x W x D)	269 x 124 x 64 mm
Weight	1,5 kg
Approvals / Compliance	DNV A-12291, CE, IEC60945
