

The USC-421 is a water-protected analogue telephone / intercom station with a high quality speaker. It can also act as master-station for talkback with USC-211 sub stations. The USC-421 is used for hands free operation on deck or in damp areas. The speaker, keyboard and hands-free microphone are designed to withstand moisture and salt mist. Standard use is loud-speaking hands free only, but an optional handset can be connected for private conversations.

**Type approved by DNV.**

### FEATURES
