

UPW-106 / 12 / 24 / 50 R

COMBINED PROGRAM AND VOLUME CONTROL

Combination of a volume control is made for 100V Public Address line. Cover plates and frames are in a modern, discreet design. It's possible to connect up to 5 different channels and to adjust volume level individually. This combined control has a built-in relay(24V DC), to allow emergency call regardless of current program and volume settings. Changeable control knobs, others available on request.
